EXPERIMENT 19

Install a C compiler in the virtual machine created using virtual box / VM Ware

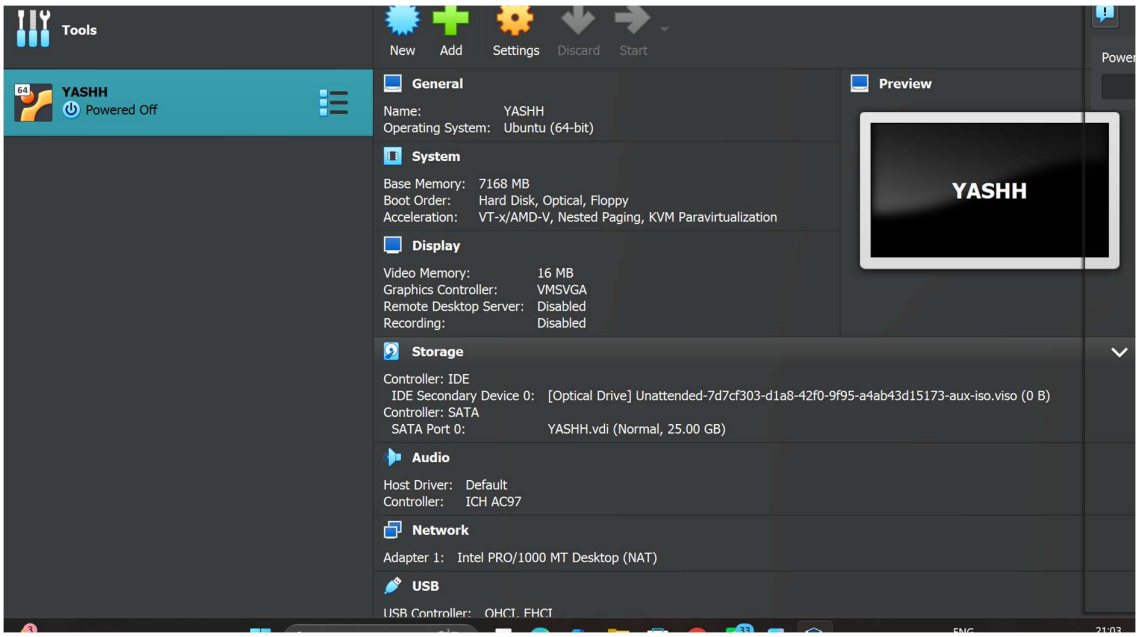

Workstation / Player and execute Simple C Programs.

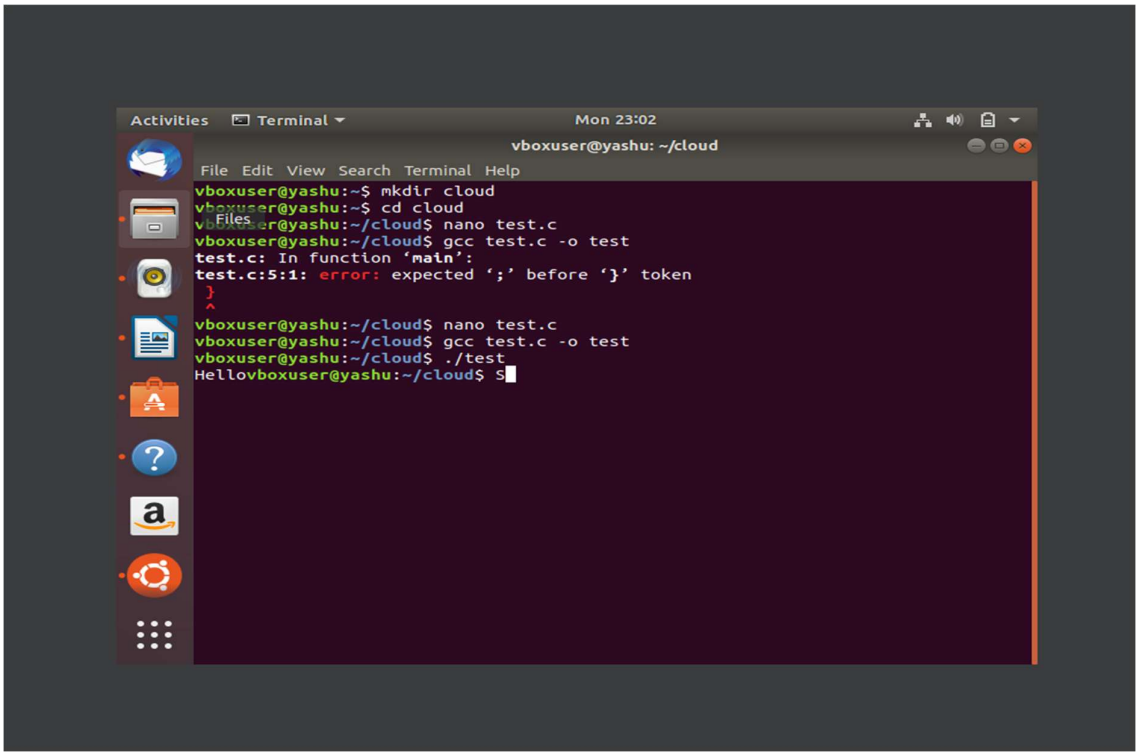

Aim:

To install a C compiler in a virtual machine created using VirtualBox/VMware Workstation/Player and execute simple C programs.

Procedure:

1. Create and start a virtual machine with a Linux/Windows operating system.
2. Install a C compiler such as GCC in the virtual machine.
3. Open the terminal/command prompt and verify the compiler installation using gcc --version.
4. Create a simple C program using a text editor.
5. Save the program with a .c extension.
6. Compile the program using gcc program.c -o program.
7. Execute the compiled program using ./program (Linux) or program.exe (Windows).
8. Observe and verify the output.
